PROFILE

Full-stack and AI developer building dependable web interfaces, document-processing workflows, and human-supervised AI systems. Experience spans React and TypeScript frontends, Python/FastAPI services, Azure document extraction, Databricks-backed assistance, and deterministic analytics.

EXPERIENCE

NICL | AI Intern

June 2026 - Present | Lahore, Pakistan

- Develop an internal AI operations and document-processing platform using Python, FastAPI, React, and SQLite.
- Implemented Azure Document Intelligence workflows with concurrent batches, retry handling, and visible per-file failure states.
- Extended guarded SAP and Excel consumption processing while keeping consequential actions under operator supervision.
- Built role-based operator views plus Databricks-backed assistance, deterministic local analytics, and native SVG charts.

PROJECTS

Portfolio & Interface Lab

React | TypeScript | Tailwind | Vite

- Designed and built this responsive editorial portfolio with two themes, accessible interaction patterns, and 12 live component demos.
- Implemented a retrieval-grounded portfolio assistant with a Databricks-to-OpenRouter provider cascade and a scripted offline fallback.

EDUCATION

Lahore University of Management Sciences (LUMS)

Expected 2027

BS Computer Science

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML, CSS

Frontend: React, Tailwind CSS, Framer Motion, responsive UI, accessibility

Backend & AI: FastAPI, REST APIs, SQLite, Azure Document Intelligence, Databricks, RAG, LLM APIs

Tools: Git, GitHub, Vite, Vercel, testing and CI workflows
